

MEDICAL COUNTERMEASURES PROGRAM

BRIEFING AND CALL FOR PROJECTS – ROUND 3

The Defence Materials Technology Centre (DMTC) is proud to present its call for expressions of interest from prospective industry and research partners for Round 3 of the Medical Countermeasures Program. This key program is developing and delivering product solutions and strategies to benefit civilian and military health in Australia and globally. Program themes include Diagnostics, Antimicrobial Resistance and Security Sensitive Biological Agents, and encompass vaccines and therapeutics.

Register now to participate in this briefing for this exciting and high profile program. Participants can expect a deeper understanding of the program, its objectives and of the specific timelines for Round 3. Click [here](#) for additional background information, and also read the accompanying flyer on the program.
