

CAPABILITY THROUGH COLLABORATION

Health Security Systems Australia (HSSA)'s mission is to lead collaborative research and development programs for the protection of military and civilian personnel against Chemical, Biological and Radiological (CBR) threats, emerging infectious diseases & pandemics.

CAPABILITIES

- Providing strategic investment for innovations that have real world impact and value.
- Harnessing niche expertise from government, industry and research sectors to accelerate the development of technologies, platforms, tools and therapeutic assets.
- Track record in delivering collaborative projects.
- Managing funds across multi-year programs of effort.
- Ability to provide frank and fearless advice across Australian Government agencies with a stake in health security due to broad and deep relationships.
- International relationships and credibility, which provides opportunities for co-investment.
- Support to Australian startups and small businesses to scale and pursue dual-use and export markets.

ENABLED BY

- Structural independence from government and not-for-profit status, allowing for a whole-of-government, whole-of-industry approach.
- Program management approach that maximises return on investment and provides context for discrete project activities.
- Expertise and experience in agile project management.
- Focus on due diligence and independent reviews to direct and complement research and development activities.
- High-performing teams leveraging collaboration, trusted partnerships and diversity to deliver enhanced business outcomes.
- Highly-credentialed team with deep subject-matter expertise and national security clearances.

DIVISIONAL ADVISORY PANEL & STAKEHOLDER GROUP

The support HSSA receives from industry partners, research organisations, Defence and other Government customers is fundamental to its success. As a division of DMTC Limited, HSSA benefits from specialist advice provided by members of a Stakeholder Group and Divisional Advisory Panel. Members contribute their perspectives on the development and implementation of divisional objectives. The Stakeholder Group and Divisional Advisory Panel consists of individual representatives of DMTC's broader partner organisations and customers. Current membership includes representatives from the following organisations:

Government

- Department of Defence; Department of Health and Aged Care; Department of Industry, Science and Resources; Department of Home Affairs; Department of Foreign Affairs and Trade; Australian Federal Police.

Research

- DSTG, CSIRO, Australian universities currently represented by ANU and UNSW.

Industry

- MTPConnect, Planet Innovation.

CERTIFICATIONS & AFFILIATIONS

Certifications

- ISO9001 and ISO 44001 certified project and relationship management systems.
- ISO27001 compliant IT systems.
- Defence Industry Security Program (DISP) accredited.

Affiliations

- SABRE Alliance (Safeguarding Australia through Biotechnology Response and Engagement).
- Australian Defence Science and Universities Network (ADSUN).
- Australian Antimicrobial Resistance Network (AAMRNet).
- AusBiotech.
- BioMelbourne.
